## First Aid

- **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- **IF ON SKIN:** Wash thoroughly with soap and water. If irritation develops, contact a doctor or poison control center for treatment advice.
- **IF INGESTED:** Rinse mouth out with water and contact a doctor for treatment advice.
- **IF INHALED:** Move affected person(s) to fresh air. Call a doctor for further advice if there is difficulty breathing.

Have the product label or container with you when seeking treatment or medical advice.

## Precautionary Statements

### Hazards to Humans

**CAUTION:** Not for use on humans. Causes moderate eye irritation. Avoid contact with eyes or clothing and inhalation of dust.

**Personal Protective Equipment (PPE):** Applicators and other handlers must wear:

- A NIOSH approved respirator
- Safety goggles
- Long-sleeved shirt and long pants
- Shoes plus socks
- Individuals with sensitive skin may choose to wear chemical resistant gloves

**User Safety Recommendations:** Avoid contact with eyes, skin, clothing, or plants. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

## Use Restrictions

Apply this product only as specified on this label. Only protected applicators may be in treatment area during application.

- DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift.
- DO NOT apply directly to production animals.
- DO NOT remain in treated area. Wait until product has settled to return to the area. It is not necessary to remove animals from the area being treated.

## Storage and Disposal

**STORAGE:** Store in a cool, dry area. Store unused portion in an airtight, sealed container.

**CONTAINER HANDLING:** Non-refillable container. **If empty:** Place in trash. **If partly filled:** Call your local solid waste agency for disposal instructions.

## Directions for Use

TechDust® may be applied with a hand or power duster. Dust may be injected into areas where insects tunnel or nest using a bulb applicator. To be used in and around livestock premises, including: poultry operations, dairy barns, calf hutches, horse barns, swine quarters, pens and shelters and other associated areas where insect control is necessary. Product use permitted in other areas or facilities when product is used according to label directions.

### To Treat an Outbreak

Dust can be applied during an outbreak while animals are present. Prior to application, turn off cooling and evacuation fans. Keep fans off until dust has settled (about 15 minutes). DO NOT remain in treated area after application. Wait until product has settled to return to the area.

- Apply 2.5 to 3.25 lbs per 1,000 sq. ft. using a backpack blower to all surfaces in the house especially areas where roaches are known to harbor, approximately 30 to 40 pounds per 12,000 sq. ft. house.

- Apply as needed using a bulb or hand applicator to areas between and around double studs ensuring that all internal surfaces are coated.

When used in dairy barns or facilities, close milk bulk tank lids to prevent contamination.

Reapply as needed.

### For Preventative Use

Apply product in the same manner as above for outbreak treatment. Apply monthly, after cleanouts, if infestation levels rise or prior to placement of new animals. Spot treat areas of the house where roaches congregate.
