

Poultry Mite Dust was first sold in February 2016, and since that time we have learned a great deal.

Getting the Best
from **PureScience**
Poultry Mite Dust

Here are our top tips to get the best from PureScience Poultry Mite Dust.

DO

- ✓ **Use the Stihl® SR450 machine for application.**
- ✓ **Make rodent control your top priority.**
- ✓ **For bed bug control, ensure you have good access to attic spaces.** Treat the entire attic space with PureScience Poultry Mite Dust.
- ✓ **Be patient!** Optimum results are seen in two–three weeks from application.
- ✓ **Consider moving to a preventive regimen.**
- ✓ **Consider using a professional applicator for the curative and preventative applications.**

DON'T

- ✗ **Operate any ventilation fans during the application and for about 10–15 minutes after application.**
- ✗ **Rev the engine** when using the Stihl SR450, the engine running on idle is sufficient for the application of PureScience Poultry Mite Dust.
